95/5A, Elliot Road, Galle

TECHNICAL SKILLS

Programming Languages

- Java
- Python
- C
- C#
- PHP
- JavaScript

Web Development

- React
- HTML
- CSS
- Tailwind CSS

Databases

- MySQL

Tools and Platforms

- GitHub
- VScode

Others

- Data Structures and Algorithms
- Object Oriented Programming

PROFILE

I am a passionate and self-motivated Computer Science undergraduate with an interest in software development and emerging technologies. I enjoy building user-friendly applications and solving real-world problems through web and application development. I am eager to learn new technologies, enhance my skills, and contribute effectively in a team-oriented and dynamic environment.

EDUCATION

Uva Wellassa University (2023 -Present)

Department of Computer Science and Informatics ,

- BSc. (Hons) in Computer Science and Technology

Mahinda College Galle (2007-2020)

- G.C.E Advanced Level :
  Combined Mathematics - A
  Physics - C
  Chemistry - B
- G.C.E Ordinary Level (2017) : 8 A's and 1 B

PROFESSIONAL QUALIFICATION

Diploma in IT (2022)
IDM Southern Campus

Diploma in English (2023)
ICBT Campus

AI/ML Certificate Course (ongoing)
SLIIT

EXTRA CURRICULAR ACTIVITIES

School : Scouts, Western Band, Chess, Swimming, Basketball, Do you know Society

University :

- Member of IEEE, Uva Wellassa University
- Participate Hackathon in 2024
- Member of University Chess team (2023-present)
- Participate SLUG and Inter University Games
- Current Chess team Captain

INTERPERSONAL SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Public Relations

LANGUAGES

- Sinhala
- English

PROJECTS

LegalEase – A Web Platform for Online Legal Consultation (Group Project)

Developed a web-based legal consultation platform enabling clients to connect with lawyers, book and manage consultations, and make secure online payments, while providing lawyers with verified accounts and tools to manage appointments. Built responsive frontend interfaces and backend functionalities, including user authentication, lawyer verification, consultation scheduling, and payment management, following an iterative development approach.

Technologies: PHP, JavaScript, MySQL, Stripe payment gate
Role: Full-Stack Developer

Feasto - Food ordaring and delivery tracking system (Group Project)

Developed a web-based platform for online order foods, check the foods, get discounts, online payments

Technologies: Python, JavaScrit
Role: Full-Stack Developer

Space Shooter - 2D android game (Individual Project)

Developed a 2D space shooter game where players control a spaceship, destroy enemy ships, avoid obstacles, and earn points by surviving increasingly difficult waves. Implemented game mechanics including player movement, collision detection, enemy AI, scoring system, health management, and game-over conditions. Designed an interactive user interface and optimized gameplay to provide a smooth gaming experience.

Technologies: Unity Engine, C#
